13. Other:			
/Asad M Nawaz/			
Supervisory Patent Examiner, Art Unit 2442			

Continuation of 3. NOTE: The Amendment After Final changes the scope of the claims, requiring further search and consideration; specifically the argued 'router'.

Continuation of 11. Does NOT place the application in condition for allowance because: The arguments largely recite previously addressed arguments and the After Final Amendment's 'router' and need not be addressed. Regarding Applicant's bulleted arguments on page 7:

That the combination of Richmond in view of Ghys would cause all excess packets to be dropped is not persuasive. Either because no packets other than initialization packets are actually required by claim 1 or because dropping packets is required by the claim, the argument is not persuasive. Note also that the packet rules can be specific to initialization messages, and there can be multiple rules (See Richmond as cited and Abstract).

That the combination of richmond in view of Ghys would achieve a second system implemented to estimate a bill (Ghys) is not persuasive. As discussed on pages 6 and 7 of Final Rejection dated 5/25/2010, Richmond discloses all the filtering required in claim 1, and lacks only in the specific motivation to filter initialization messages, though fully capable of doing so. Ghys was added to teach that initialization messages were a particular threat to operators that was known at the time of invention. Such a teaching need not be accompanied by the billing of Ghys.
